

SHUBHAM PATEL

Full-Stack .NET Developer | 3+ Years Experience

Lucknow, UP, India • 7307377298 • shubham.patel.swe@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack .NET Developer with 3+ years of experience delivering scalable, high-traffic web applications for large-scale government platforms serving 1M+ users. Proven track record of reducing query latency by 40%, cutting post-deployment bugs by 60%, and integrating complex third-party APIs (Aadhaar, DigiLocker, Payment Gateways). Strong expertise in ASP.NET Core, C#, SQL Server, React, Angular, and TypeScript, with hands-on experience in REST API design, performance optimization, and database architecture.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, C, C++, Java

Frameworks: ASP.NET Core, ASP.NET MVC, Entity Framework Core, Razor Pages, React, Angular

Backend: REST API Design, Authentication (JWT/OAuth), Caching, Performance Optimization, ADO.NET, LINQ

Database: SQL Server, Stored Procedures, Query Optimization, Schema Design, Indexing, In-Memory Caching

Frontend: React, Angular, TypeScript, HTML5, CSS3, Responsive Design

Tools & DevOps: Git, GitHub, Docker, Postman

Architecture: MVC, Layered Architecture, System Design, RESTful Services

Integrations: Aadhaar API, DigiLocker, Payment Gateways, YouTube API, GPS APIs

PROFESSIONAL EXPERIENCE

Software Developer | [Technosys Services Pvt Ltd, Lucknow](#)

March 2023 – Present

Tech Stack: ASP.NET MVC, .NET Core, C#, TypeScript, React, Angular, SQL Server

- Engineered and deployed 8+ full-stack web applications using ASP.NET MVC, .NET Core, C#, React, and Angular, serving 1,000,000+ users across national and state government platforms.
- Architected relational database schemas in SQL Server and authored optimized stored procedures, reducing data retrieval times by 40% for complex reporting modules.
- Designed and implemented secure RESTful APIs with JWT authentication to support web and mobile integrations, enabling seamless data flow across distributed systems.
- Integrated high-stakes third-party services including Aadhaar identity verification, DigiLocker for document management, and payment gateways — directly eliminating fraudulent registrations and streamlining digital workflows.
- Led rigorous code reviews and enforced engineering best practices, cutting post-deployment bugs by 60% across backend modules.
- Diagnosed and resolved critical production issues including SQL performance bottlenecks, API failures, and deployment configuration errors, maintaining 99.9% uptime on load-balanced infrastructure.
- Implemented in-memory caching strategies to handle datasets exceeding 100,000 records, significantly improving application responsiveness under concurrent load.

KEY PROJECTS

SGFI – School Games Federation of India (National Sports Management Platform)

- Architected backend workflows and database schemas for a national platform managing event scheduling, host allocation, and results tracking for 60,000+ participants.
- Integrated Aadhaar for identity verification, DigiLocker for digital certificate distribution, and secure payment gateway — reducing fraudulent registrations to near-zero.
- Optimized SQL query performance using in-memory caching and query rewrites, processing datasets of 100,000+ records with 40% reduction in query latency.

Veerangana Portal (State Women Empowerment Training Platform)

- Built backend modules for a state-wide training program managing automated teacher allocation and multi-phase evaluation workflows across all districts.
- Engineered GPS-based attendance validation and automated teacher payment logic, reducing manual processing time by 4–5 hours/week.
- Developed scalable media handling features including secure document upload systems and multi-level video galleries integrated with YouTube API.

PrernaUP (FLN Teacher Training Program)

- Constructed backend infrastructure for a state FLN teacher training program, engineering multi-phase assessment logic and rigorous data validation protocols.
- Designed the system for high-concurrency usage on load-balanced infrastructure, achieving 99.9% uptime during peak periods with massive teacher cohorts.
- Authored highly optimized SQL queries to generate real-time district and block-level performance reports from large relational datasets.

EDUCATION

B.Tech – Computer Science Engineering

Dr. M.C. Saxena Group of Colleges, Lucknow

2023 – June 2026 (Expected)

Diploma – Information Technology

Chatrapati Sahuji Maharaj Government Polytechnic, Ambedkar Nagar

2019 – 2022
